Developer:	Sonic Wall LLC
Public brand/contact:	MedTime, support@medtime.app
Website:	https://medtime.app
Platforms:	iPhone and iPad
Price:	\$4.99 per year from the Apple App Store

What It Does

MedTime helps families organize health details by profile, including medications, dose details, reminders, appointments, medical history, doctors, pharmacies, insurance, and notes.

Caregiving Focus

MedTime was built after a family health emergency made care coordination difficult. It was informed by conversations with health professionals and families navigating stroke, heart attack, and serious recovery situations.

Key Features

- Profile-based organization for self, loved ones, and pets.
- Medication and dose tracking.
- Device-specific reminder notifications with optional critical-alert escalation.
- Appointment and medical-history tracking.
- Doctor, pharmacy, and insurance records.
- iCloud-powered profile sharing with trusted MedTime users.
- CSV backups.
- Privacy-conscious defaults.

Safety Note

MedTime is an organization and reminder tool only. It does not provide medical advice, diagnosis, treatment, remote patient monitoring, or clinical decision support. Users should consult a licensed healthcare professional for medical decisions.

MedTime is an organization and reminder tool, not medical advice.
